SUMMARY

DevOps / CloudOps engineer with 16+ years in IT infrastructure and team leadership. Runs enterprise-scale Kubernetes platforms (hundreds of clusters, thousands of microservices) on AWS and Azure, builds Terraform and GitHub Actions frameworks used across hundreds of repositories, and applies AI-assisted engineering (Cursor, MCP) to platform work.

CORE SKILLS

Cloud	AWS, Azure, GCP, Cloudflare
Containers	Kubernetes (EKS, AKS, GKE), Docker, Helm
IaC	Terraform, Terragrunt, Crossplane, Ansible, Packer
CI/CD & GitOps	GitHub Actions, ArgoCD, Azure DevOps, Jenkins, GitLab CI
Observability	Prometheus, Grafana, Datadog, Honeycomb, Sumo Logic, PagerDuty
AI & GPU	MCP servers, Cursor, NVIDIA GPU Operator, GPU autoscaling
Security & FinOps	SOC 2, Snyk, Cloud Custodian, OpenCost, Vantage
Code & Data	Python, Bash, PowerShell; PostgreSQL, Redis, Elasticsearch, ClickHouse

CloudOps Engineer III
Jan 2022 – Present

Stack: AWS, Azure, Cloudflare, Kubernetes, Terraform, Terragrunt, Crossplane, Helm, ArgoCD, GitHub Actions, Azure DevOps, Jenkins, Prometheus, Grafana, PagerDuty, Python

- Operate enterprise-scale Kubernetes infrastructure spanning hundreds of clusters and thousands of microservices.
- Designed an enterprise-wide CI/CD templating framework on GitHub Actions, adopted by hundreds of production repositories.
- Migrated legacy Jenkins pipelines to GitHub Actions with self-hosted runners, improving CI/CD speed and scalability.
- Built and maintain reusable, production-grade Terraform modules that standardize provisioning across AWS and Azure.
- Diagnosed and patched critical bugs in the azurerm Terraform provider using AI-assisted debugging workflows.
- Deployed and operate Model Context Protocol (MCP) servers connecting AI models to internal tools and data sources.
- Led AI-assisted development projects end to end with Cursor: task decomposition, module design, integration and testing.
- Implemented ChatOps and GitOps automations integrating external service APIs into CI/CD workflows.

DevOps Engineer
Aug 2019 – Nov 2020

Stack: GCP, AWS, Azure, VMware, Kubernetes, Docker, Terraform, Ansible, Packer, Helm, Jenkins, GitLab CI, Travis CI, Prometheus, Zabbix

- Automated build, test and release of software across AWS, GCP and Azure, keeping releases stable.
- Turned recurring production errors into tooling that prevented repeat incidents.
- Ran security, performance and availability testing; maintained design and troubleshooting docs.

STEP LLC St. Petersburg, Russia · 2008 – 2019

Lead Linux Administrator 2016 – 2019

- Led a team of 7 system administrators across multiple locations.
- Implemented a highly available, geo-distributed VMware multi-cluster infrastructure.
- Integrated on-premise infrastructure with AWS and GCP: hybrid connectivity via site-to-site VPN, cloud-hosted workloads and off-site backups.

Senior Linux Administrator 2012 – 2016

- Built the complete server infrastructure for 400+ users from the ground up.

Linux Administrator 2008 – 2012

- Managed Linux and Windows servers and core infrastructure services.
