# Alex Potapov

**Senior DevOps / CloudOps Engineer · AWS · Azure · Kubernetes**

alexpotapov87@gmail.com · (435) 513-5214 · Cary, NC · linkedin.com/in/alex-potapov · apotapovax.github.io/resume

## SUMMARY

DevOps / CloudOps engineer with 16+ years in IT infrastructure and team leadership. Runs enterprise-scale Kubernetes platforms (hundreds of clusters, thousands of microservices) on AWS and Azure, builds Terraform and GitHub Actions frameworks used across hundreds of repositories, and integrates AI into CI/CD pipelines.

## CORE SKILLS

| | |
|---|---|
| **Cloud** | AWS, Azure, GCP, Cloudflare |
| **Containers** | Kubernetes (EKS, AKS, GKE), Docker, Helm |
| **IaC** | Terraform, Terragrunt, Crossplane, Ansible, Packer |
| **CI/CD & GitOps** | GitHub Actions, ArgoCD, Azure DevOps, Jenkins, GitLab CI |
| **Observability** | Prometheus, Grafana, Datadog, Honeycomb, Sumo Logic, PagerDuty |
| **AI & GPU** | AI in CI/CD (LLM agents), MCP, NVIDIA GPU Operator, GPU autoscaling |
| **Security & FinOps** | SOC 2, Snyk, Cloud Custodian, OpenCost, Vantage |
| **Code & Data** | Python, Bash, PowerShell; PostgreSQL, Redis, Elasticsearch, ClickHouse |

## EXPERIENCE

### FedEx DataWorks — Remote

*CloudOps Engineer III* — Jan 2022 – Present

**Stack:** AWS, Azure, Kubernetes, Terraform, Terragrunt, Crossplane, Helm, ArgoCD, GitHub Actions, Azure DevOps, Prometheus, Grafana

- Operate enterprise-scale Kubernetes infrastructure spanning hundreds of clusters and thousands of microservices.
- Own the Terraform platform: reusable, nested modules for AWS and Azure with built-in policy enforcement (tagging, encryption, network and security guardrails), including patching critical bugs in the azurerm provider, making compliant-by-default provisioning the standard across teams.
- Designed an enterprise-wide CI/CD templating framework on GitHub Actions, adopted by hundreds of production repositories.
- Migrated legacy Jenkins pipelines to GitHub Actions with self-hosted runners, improving CI/CD speed and scalability.
- Integrated AI into CI/CD: LLM agents in GitHub Actions workflows for automated PR review and pipeline failure analysis.
- Implemented ChatOps and GitOps automations integrating external service APIs into CI/CD workflows.

### ShopRunner — Remote

*Senior Cloud Engineer* — Dec 2021 – Jan 2022

*Cloud Engineer* — Nov 2020 – Dec 2021

**Stack:** AWS, Kubernetes (EKS), Helm, Terraform, Jenkins, Spinnaker, GitHub Actions, Datadog, Sumo Logic, PagerDuty, Cloud Custodian

- Owned health, performance and stability of production systems and servers.
- Implemented GitHub Actions CI and reusable CI templates for hundreds of organization repositories.
- Built and maintained Jenkins and GitHub Actions pipelines for development, testing and release automation.

### Renessans-Roaming Ltd — Remote

*DevOps Engineer* — Aug 2019 – Nov 2020

**Stack:** GCP, AWS, Azure, VMware, Kubernetes, Docker, Terraform, Ansible, Packer, Helm, Jenkins, GitLab CI, Travis CI, Prometheus, Zabbix

- Automated build, test and release of software across AWS, GCP and Azure, keeping releases stable.
- Turned recurring production errors into tooling that prevented repeat incidents.
- Ran security, performance and availability testing; maintained design and troubleshooting docs.

**STEP Construction** St. Petersburg, Russia

*Lead Systems Administrator* 2016 – 2019

**Stack:** VMware vSphere/vSAN, Hyper-V, Windows Server, Linux, AD, Exchange, Veeam, Zabbix, AWS, GCP, Terraform, Ansible

- Led a team of 7 sysadmins across HQ and remote branches; partnered with the CEO and CIO on the IT roadmap.
- Led migrations of Exchange 2007→2016, AD 2008→2016, Windows Server 2008→1809 and VMware ESX 5.0→6.7.
- Integrated on-prem infrastructure with AWS and GCP: site-to-site VPN, cloud workloads, off-site backups.
- Introduced Infrastructure as Code (Terraform, Ansible, Packer) into the enterprise environment.

*Senior Systems Administrator* 2012 – 2016

- Built the complete server infrastructure for 400+ users from the ground up.
- Built HA geo-distributed VMware clusters and 2-node vSAN / Hyper-V clusters in branches; rolled out Veeam and Zabbix.

*Systems Administrator* 2008 – 2012

- Maintained Windows and Linux servers, Active Directory, DNS, DHCP, storage and network equipment.

## TRAINING & CERTIFICATIONS

| | |
|---|---|
| Microsoft DevOps Engineer Expert (course) | 2023 |
| AWS DevOps Engineer (A Cloud Guru course) | 2021 |
| Red Hat RH124, RH134 · Cisco ICND1, ICND2 | 2018–19 |
| Microsoft 20740, 20742 (Windows Server) | 2017–18 |

## EDUCATION

**SPbGUAP** — Computer Systems and Networks 2006 – 2010
